

WiFi Policy

The Moline Public Library offers wireless network "WiFi" access to the Library's Internet service for properly equipped devices. Use of the Internet in the Library constitutes acceptance of the Library's Computer Use Policy. Please read the policy before accessing the network or see a librarian for a written copy of the full policy.

In order to use the wireless network, the users will need to bring their 802.11b or 802.11g enabled device.

The Library's wireless network is an open network and therefore not secure. The Library cannot guarantee the safety of traffic across its wireless network. The Library assumes no responsibility for the configurations, security or files on devices resulting from connection to the Library's network. Information sent to or from a device can be captured by anyone else with a wireless device and appropriate software, within the range of the access point.

The Library is not able to provide technical assistance, and there is no guarantee that patrons will be able to make a wireless connection. If assistance is needed, contact the manufacturer of the device or software. The Library is not responsible for any changes made to the settings of a device.
